Subject: RE: Anaconda remediation company interest

Hi,

I agree with the primary contact being Jack for these types of inquiries. This particular company was very vague, and did not know the Site well, or OU designations. It seems their expertise is in soil contamination remediation.

For other recent inquiries, they were mostly regarding re-processing of process solutions in OU-8 ponds, and I steered them to Taurus, not you guys.

Generally, I don't think the EPA FS Contractor will provide much help or opportunity; doesn't seem to be their role.

I also agree with not wanting to be the in-depth reviewer of all these "offers" or silver bullets, but I don't mind listening for a few minutes, then making a first cut decision at whether to forward along the offer to Jack, or just let them know they should think about other sites, not Anaconda.

Let me know how the Cache Creek inquiry works out in case Gilliland contacts me again.

Thanks,
Jeryl

Dante,

I generally think I agree, although just so I'm clear, are we talking about the site in general, or OU-8? I'm not sure what that company Jeryl references below does, or what type of requests you are receiving. If you get requests from companies soliciting technologies for the "site" in general, you can just send them my way and I can manage. We receive quite a few requests to sell us the new "silver bullet" of one kind or another.

Thanks,
-jack

Hey guys,
Some quick thoughts on solicitors to see if we are all on the same page. No to individual sampling - they can review a publically available copy of the RI report when it is ready. Fine to them contacting us if they think their technology is applicable - we should forward such information to whomever is doing the FS, for use in technology screening. I'm not interested in hearing their sales pitches myself, but again, the FS contractor can hear them out, screen them, whatever. What do you guys think?

Hi,

It seems like they are coming out of the woodwork since the Governor's letter went out. This company contacted me yesterday and are interested in sampling soil on site to determine remediation potential for their technologies. I explained it's a very complicated site and situation, and that they need to contact either EPA or Atlantic Richfield for possible contribution to proposed remedial strategies. He was insistent that I provide your contact information, so I did.

Darrell Gilliland
President
Cache Creek NA, LLC
Dgilliland32@gmail.com<mailto:Dgilliland32@gmail.com>

I expect Darrell will reach out to you guys shortly to discuss his ideas. I told him to contact EPA RPMs first, then ARC.

Jeryl
